Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 7-8-04 (Pre. Amdt).
2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 and 5-8 is/are pending in the application.

DETAILED ACTION

Applicant's preliminary amendment of 7-8-04 is acknowledged and entered.

Claim 4 has been cancelled. Claims 1-3 and 5-8 are pending.

Claim Rejections - 35 USC § 112, Second Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-3 and 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

- a. Claim 1 recites the definition of X as "*alkanediyl in which one methylene group may be replaced by an oxygen atom.*" Said definition has indefinite metes and bounds because it is unclear if the first methylene group could also be replaced by an oxygen atom, and thus, there would be an oxygen bonded directly to the ring nitrogen atom.
- b. The limitation of "*solvate*" (recited twice in claim 1) has indefinite metes and bounds because it is unclear what solvent and its proportion are intended.
- c. Claim 6 recites a composition in which a compound of the claimed formula I is combined with "at least one further active compound". Said composition has indefinite metes and bounds because it is unclear if a compound

of formula I and the additional active compound are in the same formulation, or if one active compound is given subsequently to the other.

Claim Rejections - 35 USC § 112

2. **Written description:** Claim 6 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 6 recites: "A composition, comprising at least one compound of the formula (I),...and at least one further active compound." Although the specification lists the additional compounds, it does not teach how these compounds could be formulated with compounds of formula I. It does not generically teach the proportion of each active compound that could be combined, nor does it teach dosages and intervals of active compounds that could be administered subsequently. Thus, the composition recited in claim 6 does not have adequate written description.

Reference cited on PTO-892

3. Cited references show state of the art only. While they teach the core of *tetrahydroquinazolin-diones*, or *2,4-dioxo-thiopyrano[4,3-d]pyrimidine*, they fail to teach a substituent corresponding to the claimed side chain of $-X-R^2$.
